

PROJECT INFORMATION SHEET

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG

IIS-USEPA-Clinton River Mouth Coastal Wetlands Restoration

Description

The project is located at the mouth of the Clinton River along the Lake St. Clair shoreline in Harrison Township, MI. The Clinton River is an Area of Concern (AOC). This project will restore environmental conditions at the mouth of the Clinton River, remove invasive species, soften the shoreline and develop wetlands on the surface of an old dredged material placement facility. The completed project will add positive benefits to two Beneficial Use Impairments (BUIs), loss of Fish and Wildlife Habitat and Degraded Fish and Wildlife Populations in the AOC.

Status

The project was transferred from the Great Lakes Fisheries and Ecosystem Restoration (GLFER) authority to an Economy in Government Act to restore wetlands at the mouth of the Clinton River. A collaboration between the USEPA and the Corps evolved to restore a former dredged material disposal facility, soften the shoreline and create fish and wildlife habitat at the mouth of the Clinton River. In 2015, the Corps removed invasive Phragmites and conducted bathymetric and topographic surveys of the site. The Corps will complete design in early FY17 with construction contract award expected near the end of FY17.
